

VLDB2014

40th International Conference on Very Large Data Bases, Hangzhou, China

Proceedings of the VLDB Endowment

Volume 7, No. 12 – August 2014

**Proceedings of the 40th International Conference on
Very Large Data Bases, Hangzhou, China**

Program Chairs and Editors-in-Chief:

H. V. Jagadish, Aoying Zhou

Associate Editors – Research and Innovative Systems Tracks:

**Shivnath Babu, Lei Chen, Graham Cormode, Bin Cui, Wynne Hsu, Martin Kersten,
Donald Kossman, Elke Rundensteiner, Kyuseok Shim, Wang-Chiew Tan, Letizia Tanca, Jeffrey Yu**

Associate Editors – Experiments and Analysis Track:

Gao Cong, Jens Dittrich

Associate Editors – Vision Track:

Zachary Ives

Proceedings Chairs:

Li Xiong, Cong Yu

VLDB 2014 ORGANIZATION AND REVIEW BOARD

Honorary Chair

Yunhe Pan, Chinese Academy of Engineering

General Chairs

Chun Chen, Zhejiang University

Sharad Mehrotra, University of California, Irvine

Program Chairs and Editors-in-Chief of PVLDB 7

H. V. Jagadish, University of Michigan

Aoying Zhou, East Normal University, China

Research and Innovative Systems Tracks Associate Editors

Shivnath Babu, Duke University

Lei Chen, Hong Kong University of Science and Technology

Graham Cormode, University of Warwick

Bin Cui, Peking University, China

Wynne Hsu, NUS

Martin Kersten, CWI

Donald Kossman, ETH

Elke Rundensteiner, WPI

Kyuseok Shim, Seoul National University

Wang-Chiew Tan, University of California, Santa Cruz

Letizia Tanca, Poli Milano

Jeffrey Yu, Chinese University of Hong Kong

Experiments and Analysis Track Associate Editors

Gao Cong, Nanyang Technology University

Jens Dittrich, Saarland

Visions Track Associate Editor

Zachary Ives, University of Pennsylvania

Industrial and Applications Track Associate Editors

Umeshwar Dayal, HP

C. Mohan, IBM

Ge Yu, Northeastern University, China

Demonstration Chairs

Mong-Li Lee, NUS
Feifei Li, University of Utah
Sunil Prabhakar, Purdue

Tutorial Chairs

Xiaoyong Du, Renmin University
Murat Kantarcioglu, University of Texas, Dallas
Divesh Srivastava, AT&T Labs

Research Track Review Board

Sibel Adali, Rensselaer Polytechnic Institute
Foto Afrati, NTU Athens
Yanif Ahmad, JHU
Jose Luis Ambite, ISI - USC
Walid Aref, Purdue University
Claudia Bauzer Medeiros, University of Campinas
Srikanta Bedathur, IIIT Delhi
Michael Benedikt, Oxford University
Sonia Bergamaschi, Universita Modena

REAL SESSION CHAIRS DO MORE THAN JUST KEEP TIME

Paper sessions in conferences are often poorly attended. One frequently hears statements like “Why would I attend the talk when I can read the paper and get much more out of it for the time spent?” Sessions in themselves provide no added value: there is little discussion and no correlation between papers. Instead, each session is a sequence of unilateral presentations, of varying quality.

To address this difficulty, we are trying a system this year in which the session chair is a real “chair” and much more than just a time-keeper. Over time, we hope that being a session chair will be an honor, indicating recognition in the field as a senior researcher with a good broad perspective on the topic of the session.

So, what does a “real chair” do? This person introduces the topic of the session, and places the papers in the session in the context of other work on this topic. To do this, the session chair starts the session with a short “invited talk” providing the background and laying out the issues for the session, along the lines of a good moderator at a typical conference panel session. A “real chair” also facilitates discussion of the presented papers at the end of a session, again in the same manner as a good panel moderator.

One major constraint on the session chairs is that they do not get to choose the papers in their session – rather these papers are selected through a separate (PVLDB) review process and given to them. However, subject to this constraint, session chairs can choose the name of the session, and hence define the topic scope; choose the order in which papers are presented in their session, and choose the (initial) topics for discussion.

A complementary attempt to make sessions more lively is to reduce the time allotted per paper, and to reward good presentation. It is hard to maintain audience interest in a long presentation, and particularly when much of the audience is jet-lagged. By having a common introduction by the session chair, authors have to do less to present background for their work. Similarly, lengthy questions can be held off to the common discussion time at the end. We will have a total time of 14 minutes per paper this year, including 2 minutes for set up and short questions. So no speaker will be on for more than 12 minutes at a time. [I know there are some who would like more time per paper presented – but the ways to make that time have even less support -- to have more parallel sessions, to have more days in the conference, to have conference sessions go longer into the evening, or to invite fewer papers for presentation. On the other hand, there are some who believe a shorter presentation per paper is actually better, even if constraints did not force this].

To reward good presentations, we will empower session chairs to give out certificates for excellence in paper presentation. (We will separately work with session chairs to calibrate award guidelines and limit their number). Particularly for student presenters, who constitute the vast majority of conference presenters, such an award can be a valuable badge on the resume, providing evidence of their presentation skills.

H. V. Jagadish, University of Michigan, Ann Arbor, MI, USA
Program Co-Chair, VLDB 2014
